

HPE IMC BRANCH INTELLIGENT MANAGEMENT SYSTEM SOFTWARE MODULE WITH 50-NODE E-LTU (JG265AAE)

Intelligent Management Software

WHAT'S NEW

- Unified remote resource management.
- Comprehensive configuration management.
- Flexible, with enhanced security features to communicate with devices.
- Zero touch device deployment.

OVERVIEW

HPE IMC Branch Intelligent Management System (BIMS) Software is an Intelligent Management Center (IMC) optional module designed to remotely manage network infrastructure using the TR-069 protocol. IMC BIM Software can manage a large number of branch networking equipment without the limitations posed by traditional remote network management methods such as Telnet, SSH, SNMP, or Web remote login.

Branch network devices can be remotely deployed, configured and serviced. IMC BIMS further simplifies the experience of managing remote networks and lowers the operating costs of network managements.

FEATURES

Simplify Remote Resource and Configuration Management for Branch Network

The HPE IMC Branch Intelligent Management Systems (BIM) Software allows administrators to remotely configure device parameters, update software, reboot and restore the device to factory defaults based on TR-069 protocol.

Devices can be remotely deployed and auto-configured by templates that are sent to the device by the Intelligent Management Center (IMC) to deliver zero touch deployment.

BIM Software automates batch device configuration to reduce the error-prone complexities of the upgrade process.

Devices are identified by serial numbers rather than IP addresses to simplify device identification in a DHCP environment.

Delivers Comprehensive Remote Management in Secured or Private Networks

The HPE IMC Branch Intelligent Management Systems (BIM) Software can communicate and manage devices that are private.

IMC BIM Software also uses HTTPS to securely communicate with or to transfer files to the device.

Technical specifications

HPE IMC Branch Intelligent Management System Software Module with 50-node E-LTU

Product Number (SKU)	JG265AAE
Differentiator	HPE IMC Branch Intelligent Management System Software Module with 50-node License
Platform required	HPE Intelligent Management Center Enterprise Software HPE Intelligent Management Center Standard Software
Technical notes	Service-oriented architecture (SOA) Web 2.0 interface Ease of deployment

Most, if not all IT organizations are on a digital transformation journey — each at a different stage. With over 11,000 IT projects conducted and 1.4 million customer interactions each year, [HPE Pointnext Services](#)' 15,000+ experts and its vast ecosystem of solution partners and channel partners are uniquely able to help you at every stage of your digital transformation. We bring together technology and expertise to help you drive your business forward and prepare for whatever is next.

Advisory and Professional Services help you accelerate your digital transformation. [Operational Services](#) help you remove complexity and respond rapidly to business demands.

Operational Services from HPE Pointnext Services

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

- **[HPE Datacenter Care](#)** helps modernize and simplify IT operations. Partner with an assigned account team, access technical expertise, an enhanced call experience gives you priority access, choose hardware and software support, implement proactive monitoring to help stay ahead of issues, and access HPE IT best practices and IP.
